

VENKANNA BABU KOTHA

Senior DevOps Engineer || Cloud & Kubernetes || CI/CD || DevSecOps & Infrastructure Automation

+91-9392097569

venkannababu.kotha96@gmail.com

[Venkannababu Kotha LinkedIn ID](#)

PROFILE SUMMARY

- Technology Oriented DevOps Engineer with 6+ years of experience in architecting & optimizing scalable cloud infrastructure, CI/CD pipelines & containerized application deployments across AWS & Azure environments.
- Notable success in implementing GitOps practices, integrating security into CI/CD pipelines & building resilient, production-grade environments with monitoring & observability frameworks.
- Innate excellence in driving automation, CI/CD pipeline orchestration, infrastructure as code & cloud management, employing tools like Jenkins, Kubernetes & Terraform, to steer transformation of development & operations into a seamless, efficient & agile ecosystem. Expertise in automating software delivery, while increasing release frequency & reducing manual errors by 55%. Optimizing & streamlining development & delivery and attaining 45% boost in deployment efficiency while substantially minimizing system downtime to Zero.
- Expertise in managing cloud infrastructure, specifically in the configuration & maintenance of Azure & AWS environments, guaranteeing secure & scalable solutions tailored to organizational requirements. Directed the transition of legacy systems to cloud-native architectures, achieving a cost reduction of 25% and enhancing system performance, demonstrating adaptability to changing technological environments.
- Led a recent initiative to incorporate Snyk into CI pipelines, resulting in enhanced vulnerability detection & remediation for containers & dependencies prior to deployment.
- Possess strong leadership, collaborative & problem-solving skills to optimize performance, enhance security & reduce time-to-market by 40% while ensuring cost-effective resource allocation. Skilled at incorporating security best practices into the DevOps process, enhancing the protection of sensitive data & applications.

WORK EXPERIENCE

LTIMindtree, Hyderabad || Specialist (Software Engineering)

📅 Sep 27th 2024 to Present

Enterprise DevOps Transformation & Secure Cloud Delivery | CVS Pharmacy

Tenure: Mar'25 to Present

Tech Stack: GitHub Actions, Terraform, Azure, Kubernetes, ArgoCD, Istio, Helm, JFrog, Snyk, Docker, Python, Shell

CI/CD Automation & GitOps Excellence

- Engineered robust GitHub Actions pipelines to automate build, testing, security scanning, and multi-environment deployments—accelerating release cycles and ensuring consistency.
- Institutionalized GitOps practices using ArgoCD with environment-specific Helm configurations, enabling controlled, scalable & traceable deployments.

Cloud Infrastructure & Platform Engineering

- Architected reusable Terraform modules to provision and manage AKS clusters, Azure Application Gateway, and critical cloud infrastructure—enhancing scalability and infrastructure reliability.
- Optimized artifact lifecycle management through JFrog Artifactory, streamlining Docker image storage and seamless promotion across environments.

Zero-Downtime Deployments & Service Mesh Implementation

- Led Istio service mesh implementation to enable canary releases, intelligent traffic routing, and secure mTLS communication—ensuring zero-downtime migrations and enhanced service resilience.

DevSecOps & Risk Mitigation

- Embedded Snyk into CI pipelines to proactively identify and remediate container and dependency vulnerabilities, strengthening pre-deployment security posture.

Cloud-Native CI/CD Optimization & Observability Engineering | Cisco Systems Inc. (Catalyst Center)

Tenure: Sep'24 to Mar'25

Tech Stack: Jenkins, AWS, Kubernetes, Docker, Helm, Prometheus, Grafana, ELK, Python, Linux, Shell, Bitbucket, VMware

CORE COMPETENCIES

- DevOps Methodology
- Cloud Solution Consultation & Architecture (AWS & Azure)
- Business/ IT Transformation & Automations
- Kubernetes & Container Orchestration
- Infrastructure as Code (Terraform)
- Agile/ Scrum Methodologies
- Continuous Integration (CI) & Continuous Deployment (CD)
- Release Management || Deployment Strategy
- GitOps & Continuous Delivery (ArgoCD)
- DevSecOps & Security Integration
- Site Reliability Engineering
- Application Containerization || Observability Systems
- Source Code Management
- Platform Engineering & Environment Stability
- Cloud Infrastructure Optimization || Infrastructure Security Protocols
- Service Delivery Excellence
- IPC (Incident, Problem & Change) || SLA & KPI Management
- Client & Stakeholder Engagement

TECHNICAL SKILLS

- Cloud Platforms: AWS | Microsoft Azure
- CI/CD & DevOps Tools: Jenkins | GitHub Actions | ArgoCD | JFrog Artifactory
- Containers & Orchestration: Docker | Kubernetes | Helm
- Infrastructure as Code & Configuration: Terraform | Ansible
- Monitoring & Observability: Prometheus | Grafana | ELK Stack
- Version Control: Git | GitHub | Bitbucket
- Programming & Scripting: Python | Shell | SQL
- Security & Quality Tools: SonarQube | Snyk
- Operating Systems: Linux | Windows

CI/CD Performance Engineering

- ❖ Automated end-to-end build, test, and deployment workflows using Jenkins pipelines integrated with Bitbucket, significantly improving release efficiency.
- ❖ Enhanced pipeline performance through strategic optimizations, reducing build times and improving delivery throughput.

Kubernetes Scalability & Resilience

- ❖ Implemented auto-scaling and self-healing capabilities using Kubernetes HPA, ensuring high availability and optimal resource utilization under varying workloads.
- ❖ Streamlined application deployments via Helm-based packaging, improving consistency and deployment speed.

Observability & Real-Time Monitoring

- ❖ Designed enterprise-grade monitoring frameworks using Prometheus and Grafana, enabling real-time visibility into application and infrastructure performance.
- ❖ Developed advanced Grafana dashboards and alerting mechanisms based on performance thresholds and failure patterns, enabling proactive incident management.

Tarantula India Pvt. Ltd., Hyderabad || Software Engineer

Feb 2nd 2022 to Sep 26th 2024

Cloud Infrastructure Automation & DevOps Enablement | Indus Towers

Client: Indus

Tech Stack: Jenkins, Terraform, Ansible, AWS, Kubernetes, Docker, Prometheus, Grafana, SonarQube, Git, Python, Shell

- ❖ **Infrastructure as Code & Environment Engineering:** Engineered scalable cloud infrastructure using Terraform, establishing robust Dev, QA, and Production environments with high reliability and consistency.
- ❖ **CI/CD Automation & Release Efficiency:** Streamlined build and deployment lifecycles through Jenkins-driven automation, accelerating delivery timelines and reducing manual dependencies.
- ❖ **Containerization, Orchestration & Platform Reliability:** Strengthened platform stability by orchestrating Dockerized applications on Kubernetes, enabling efficient deployment, monitoring, and lifecycle management.
- ❖ **Observability & Monitoring Excellence:** Built integrated monitoring and APM capabilities using Prometheus and Grafana, delivering real-time performance insights through dynamic, time-series dashboards.
- ❖ **Artifact Management & Repository Optimization:** Established & managed remote repositories for OSS package distribution via Artifactory, improving dependency management and access efficiency.
- ❖ **Automation, Scripting & Data Resilience:**
 - Automated routine operational checks using Python, improving efficiency and reducing manual effort.
 - Designed and implemented backup and recovery scripts to safeguard data integrity and ensure high availability.

Legato Health Technologies, Hyderabad || Software Engineer

Jun 22nd 2020 to Feb 01st 2022

Cloud DevOps Enablement & CI/CD Optimization | GBD (Government Business Division)

Client: Anthem Inc.

Tech Stack: AWS, Jenkins, Docker, Kubernetes, Terraform, Git, GitHub, Maven, Azure DevOps, Linux, JFrog Artifactory

Cloud Infrastructure & Platform Reliability

- ❖ Orchestrated cloud infrastructure provisioning and lifecycle management on AWS, ensuring stable, scalable, and high-availability environments.
- ❖ Strengthened foundational networking by effectively managing VPCs, subnets, route tables, and gateways to support secure and efficient deployments.

CI/CD Engineering & Release Acceleration

- ❖ Streamlined end-to-end CI/CD workflows, enabling seamless build, integration, and deployment cycles across development and QA environments.
- ❖ Optimized pipeline management using Azure DevOps and Jenkins, improving release consistency and reducing deployment friction.

Artifact Management & DevOps Governance

- ❖ Administered JFrog Artifactory operations, ensuring efficient artifact storage, version control, and dependency management across environments.

Monitoring, Alerting & Incident Responsiveness

- ❖ Strengthened system reliability by proactively monitoring AWS CloudWatch alerts across server health, CPU, memory, disk, and process metrics—enabling timely issue resolution and minimizing downtime.

SOFT SKILLS

Strategic Planner	Leader
Adaptability	Innovator
Communicator	Collaborator

EDUCATION

 B.Tech. SRKR Engineering College 2017
 Diploma Aditya Engineering College 2014

PERSONAL DETAILS

Address: Andhra Pradesh
Languages Known: Telugu, English & Hindi

Cloud-Native DevOps Transformation & Reliability Engineering | RTI Surgical

Client: RTI Surgical

Tech Stack: Jenkins, Docker, Kubernetes, Terraform, Ansible, AWS, Prometheus, Grafana, Git, Maven, Python, Linux

CI/CD Engineering & Deployment Acceleration:

- ❖ Architected and optimized Jenkins-driven CI/CD pipelines, accelerating deployment velocity by 35% and ensuring consistent release quality.
- ❖ Strengthened code integration and collaboration using Git-based workflows, enabling smoother cross-functional delivery cycles.

Cloud Optimization & Cost Efficiency

- ❖ Engineered and managed AWS infrastructure, driving a 25% reduction in cloud spend while improving overall resource utilization and scalability.
- ❖ Enforced AWS best practices and conducted security audits, reducing system vulnerabilities by 50% and enhancing platform resilience.

Infrastructure Automation & Environment Consistency

- ❖ Automated infrastructure provisioning & configuration using Terraform & Ansible, ensuring standardized, repeatable & scalable environment setups.

Containerization, Orchestration & High Availability

- ❖ Deployed and managed containerized workloads on Kubernetes, achieving 99.5% uptime and strengthening system reliability.

Observability & Proactive Incident Management

- ❖ Established robust monitoring and alerting frameworks with Prometheus and Grafana, reducing MTTD by 40% and enabling faster issue resolution.

Automation, Efficiency & Knowledge Enablement

- ❖ Developed Python-based automation solutions to streamline routine operations, improving efficiency by 20%.
 - ❖ Delivered comprehensive documentation across CI/CD, infrastructure & disaster recovery, ensuring operational continuity & knowledge scalability.
-
